

## **MAINTENANCE PROCEDURES**

### Lightning Lockers Heavy Duty Sheet Metal Lockers

---

#### **ANNUAL INSPECTION AND MAINTENANCE**

- Clean interior and exterior of lockers with mild detergent followed by clean water rinse and towel dry
- Tighten loose hardware on body and hooks with 3/8" hex nut driver or replace rivet with hand rivet tool.
- Tighten loose hardware on handle assembly with 1/4" hex nut driver or replace rivet with hand rivet tool.
- Adjust door jambs on frame member if door does not latch properly with plier or hand rivet tool. Adjust downward if door hangs up and upward if fails to latch.
- Straighten lockbar pins in door channel if bent. Not applicable to Single Point Latch lockers.
